

## DERMAPLANING

Manual exfoliation technique that removes surface debris with custom dermaplaning blade

### BENEFITS OF DERMAPLANING

- Increases absorption of topical products
- Immediately diminishes the appearance of fine lines and wrinkles
- Primes skin for chemical peels
- Creates healthier, more radiant appearance

Dermaplaning is an exfoliation technique that refinishes the epidermis through a controlled scraping which

The benefits of this procedure include minimizing the appearance of fine lines, increased ability for your

### DOES HAIR GROW BACK THICKER?

Although merely an old wives' tale, clients are often concerned that the hair will grow back heavier and darker after dermaplaning. This is not the case. As long as the hair is superficial vellus hair, it will grow back at the same rate and texture as before the treatment.

### WHAT CAN YOU EXPECT DURING YOUR TREATMENT?

Your face will be cleansed then the painless procedure will be performed (feels somewhat like a cat licking your face) we then finish with customized product application to smooth and nourish your skin. You may even opt to add a superficial peel for £40 to amplify the results.

### HOW TO PREPARE FOR THIS TREATMENT:

Please avoid tanning the area to be treated. If you do go out in the sun, use sun block and apply every 80 minutes when in direct sun, for at least 3 weeks prior to your treatment. Deeply tanned skin should be treated 4 to 6 weeks after active sun exposure.

For 2 to 3 days prior to treatment, discontinue any irritant topical agents, such as alpha-hydroxy acids, beta-hydroxy acids, glycolic acids, and retinols. These can be resumed 1 week after procedure.

### AFTER TREATMENT INSTRUCTIONS TO FOLLOW FOR BEST RESULTS:

Please avoid sunlight or use sunscreen religiously. Your skin will look fabulous immediately after and you may resume most activities (please do not work up a sweat for the first 48 hours after procedure).

## DERMAPLANING
