

Cernor XO

Unique dual action helps improve how dark circles look

The transparency of the skin and the presence of damaged blood vessels are two of the main causes of dark circles. Genetic predisposition, ageing and sun damage greatly influence severity.

Cernor XO Emulsion Gel is a unique combination of Vitamin K Oxide and light reflecting minerals to improve the look of dark circles.

Cernor XO consistently delivers Vitamin K Oxide through the epidermis to the site of damaged blood vessels.

Cernor XO's light reflecting mineral complex reduces skin transparency and the visibility of pigments and blood vessels.

Dark circles happen - improve how they look with Cernor XO

£24.99 Cernor XO Emulsion Gel 10ml
